# Energy

🇮🇹 Ascensore elettrico (MRL) su cui è applicata la più moderna tecnologia EP. **Energy** funziona con la tensione di rete a 230V monofase, con consumo energetico minimo grazie anche all'impiego del contrappeso. Impegno 0,55 Kw e un impatto ambientale estremamente ridotto. **Energy** consuma quanto un elettrodomestico ed è in grado di effettuare molte corse anche in assenza di corrente di rete. **Energy** è caratterizzato dall'assenza della sala macchine e può essere installato in vani in muratura o cemento armato e in vari tipi di strutture metalliche in acciaio, alluminio o acciaio Inox che ne permettono installazioni all'interno o all'esterno dell'edificio.

🇬🇧 MRL electrical lift created with the latest EP technology. It operates using single-phase voltage 230V and has a minimum energy consumption thanks also to the counterweight. With 0,55 Kw it has a reduced environmental impact. **Energy** consumption is as those of a regular home appliance and is able to continue operating normally for several runs even in the case of a power failure. **Energy** is characterized for the machine roomless space efficiencies . Other than concrete or masonry shafts there is also the possibility of steel, aluminium or stainless steel shafts, which allow installations inside or outside the building.

🇪🇸 Ascensor eléctrico (MRL) en el cual se aplica la más moderna tecnología de EP. **Energy** funciona con corriente eléctrica 230V monofásica, con consumo energético mínimo también gracias al uso del contrapeso. Potencia empleada 0,55 Kw y un impacto ambiental muy reducido. El consumo del **Energy** es paragonable al consumo de un electrodoméstico y es capaz de realizar muchos viajes incluso en ausencia de corriente eléctrica. **Energy** se caracteriza por la ausencia del cuarto de máquinas y puede ser instalado en huecos de albañilería, hormigón y en varios tipos de estructuras metálicas de acero, aluminio o acero Inox que permiten la instalación en el interior o el exterior del edificio.

🇫🇷 Grâce à la recherche de E.P. **Energy** prend naissance un ascenseur (MRL) qui applique la plus moderne des technologies sur un ascenseur électrique traditionnel. Le résultat est le premier ascenseur sur le marché qui fonctionne avec une alimentation de réseau à 230V monophasé, une consommation énergétique de 0,55 Kw et un impact environnemental extrêmement réduit. **Energy** est un ascenseur dont la consommation correspond à celle d'un appareil ménager et l'utilisateur n'est plus contraint d'augmenter la puissance de son contrat électrique pour l'installation de l'ascenseur.

🇩🇪 Die Entwicklungsabteilung von E.P. hat ein neues Modell, den **Energy** kreiert. Ein Aufzug, der traditionelle elektronische Systeme mit modernster Technologie vereint. Er ist der erste Aufzug im Markt, der mit einem haushaltstypischen 230V Anschluss betrieben werden kann und somit einen sehr geringen Energieverbrauch von 0,55 Kw, vergleichbar dem eines Haushaltsgerätes. Der Einbau des **Energy** ist in Privathaushalten mit der elektronischen Standardausstattung möglich.

 **Elfo** è un "Home Lift" destinato al trasporto di persone e cose rispondente ai requisiti della direttiva macchine 2006/42/CE. Elfo è un elevatore "su misura" infatti dimensioni, porte, accessori, colori e materiali sono configurabili in base ai gusti del cliente. **Elfo** richiede una fossa di pochissimi centimetri evitando la necessità di costose opere murarie, può essere fornito con struttura metallica in acciaio verniciato o acciaio inox, da installare all'interno o all'esterno dell'edificio. La grande flessibilità e la cura dell'estetica fanno di **Elfo** un vero oggetto d'arredamento, caratteristiche queste che la rendono la soluzione ideale per installazioni domestiche, uffici, attività commerciali o singole unità immobiliari.

 The **Elfo** "Home Lift" is intended for the transportation of persons and things in pursuant to Directive 2006/42/EC. It can be personalized on the needs of the final user. It requires a shallow pit avoiding the necessity of expensive masonry works. **Elfo** can be supplied with a metal structure to be installed either inside or outside the building. The great flexibility and the care for aesthetical details makes **Elfo** a truly interior design object, becoming an ideal solution for domestic installations, commercial activities and single units.

 **Elfo** es un "Home Lift" destinado al transporte de personas y cosas que cumple con los requisitos de la ley 2006/42/CE. Elfo es un elevador "a medida" dimensiones, puertas, accesorios, colores y materiales se pueden configurar en base a las exigencias del cliente. Elfo requiere un foso de pocos centímetros evitando la necesidad de costosas obras de albañilería, puede ser suministrado con estructura metálica en acero barnizado o acero inox, se puede instalar indiferentemente al interior o al exterior del edificio. La gran flexibilidad y la atención a la estética hacen que **Elfo** sea un auténtico objeto de arredamiento, características que lo convierten en la solución ideal para instalaciones domésticas, oficinas, empresas comerciales o unidad inmobiliarias individuales.

 **Elfo** est une "Home Lift" certifiée CE selon la Directive Machines 2006/42/CE et suivantes. Un produit personnalisable selon les exigences de l'utilisateur. Il s'adapte à tout type de gaine et il peut être installé dans tout type de bâtiment à l'intérieur et à l'extérieur, exposé aux intempéries. La plate-forme **Elfo**, pouvant être installée très facilement, a besoin d'une fosse de peu de centimètres en évitant ainsi à l'utilisateur des travaux de maçonnerie onéreux.

 **Elfo** ist ein "Homelift" mit CE-Kennzeichnung gemäss der Maschinenrichtlinie 2006/42/CE und nachträglichen Ergänzungen. Die Anlage kann nach den Bedürfnissen des Nutzers individuell gestaltet werden. Er passt sich jedem Schacht oder Aufstellbereich an und kann sowohl in Innen-als auch im der Witterung ausgesetzten Außenbereich installiert werden. Der leicht zu installierende **Elfo**-Senkrechtlift benötigt lediglich eine Grube von 13 cm. Dadurch bleiben dem Nutzer aufwendige bauseitige Leistungen erspart.

# Upper

🇮🇹 Piattaforma elevatrice rispondente ai requisiti della 2006/42/CE ed idonea per l'abbattimento delle barriere architettoniche. L'ingombro in testata di H1300mm permette installazioni anche dove lo spazio è ridotto.

🇬🇧 Open platform cabin in compliance with the 2006/42/EC Directive for the removal of architectural barriers. The reduced space needed in headroom H 1300 mm allows its installation even where the available space is minimum.

🇪🇸 Plataforma elevadora que cumple con los requisitos de la ley 2006/42/CE para el abatimiento de las barreras arquitectónicas. El espacio ocupado en la huida de solo 1300 mm permite instalaciones incluso cuando el espacio es limitado.

🇫🇷 Plate-forme élévatrice selon la Directive 2006/42/CE pour l'élimination des barriers architecturales. L'espace de HsP de 1300 mm permet une installation même si l'espace est limité.

🇩🇪 Installationen, die oben im Schacht nur sehr geringen Platz zur Verfügung haben, steht Dank **Upper** kein Hindernis mehr im Weg gemäss der Maschinenrichtlinie 2006/42/CE. Die Tatsache, dass auf der obersten Etage eine 130 cm hohe Gittertür angebracht werden kann, macht die bis heute für undenkbar gehaltene Installation möglich.

# Upper

**Upper** è sviluppato in funzione degli spazi disponibili, le parti meccaniche sono nascoste da un carter che garantisce ottimi risultati estetici, inoltre ogni cliente può personalizzare l'impianto scegliendo materiali e colori adatti alle proprie necessità.

**Upper** has been developed according to the availability of spaces, the mechanics (guides, piston, etc.) located at one side of the platform, are hidden by a protective case covering the shaft that guarantees the best aesthetic results. Furthermore, each customer can personalized the platform choosing among a wide variety of materials and colours that meets every request.

**Upper** se desarrolla según el espacio disponible, las partes mecánicas están ocultadas detrás de un carter que garantiza resultados estéticos optimales, además cada cliente puede personalizar el equipo eligiendo materiales y colores que se adapten a sus necesidades.

**Upper** est développé sur la base de l'espace disponible, les pieces mécaniques sont masqués par un carter qui assure d'excellents résultats esthétiques, en outre, chaque client peut personnaliser le système en choisissant des matériaux et de couleurs pour répondre à leurs besoins.

**Upper** ist auf der Grundlage des verfügbaren Platzes entwickelt, die mechanische Teile sind durch ein Gehäuse, welches ausgezeichnete ästhetische Ergebnisse garantiert, versteckt, hinzu kann jeder Kunde die Installation durch Auswahl von Materialien und Farben personalisieren.

# Stepper

🇮🇹 Montascale per il trasporto di persone disabili su carrozzina, particolarmente silenzioso e versatile. L'alimentazione di rete (230V) e la dotazione di batterie da 24V lo rende la soluzione ideale per il basso impegno di corrente. Il funzionamento del montascale è assicurato anche in assenza di energia elettrica. I movimenti di pedana, bracciolo e bandella sono automatici, inoltre l'assenza di cremagliera favorisce un buon risultato estetico.

🇬🇧 **Stepper** is a stairlift platform for the transportation of persons with reduced mobility in a wheelchair. Characterized by a particularly smooth and quiet operation. The power source 230V and the 24v battery supply makes **Stepper** the ideal solution for a low energy consumption. The functioning of the stairlift is assured even in the event of a power failure. The movements of the platform, safety arms and ramps are fully automatic. The absence of a rack operated system gives a better aesthetic result.

🇪🇸 Salvaescaleras para el transporte de personas discapacitadas en silla de ruedas, muy silencioso y versátil. La alimentación de red eléctrica (230V) y la dotación de baterías de 24V lo convierten en la solución ideal para la baja potencia necesaria. El funcionamiento del salvaescaleras está garantizado también en ausencia de energía eléctrica. Peana, brazo de seguridad y bandejas son motorizados, además la ausencia de cremallera favorece un buen resultado estético.

🇫🇷 Monte-escalier pour le transport de personnes handicapées en fauteuil roulant, particulièrement silencieux et polyvalent. L'alimentation (230V) et la fourniture de batteries à 24V le rend idéal pour le faible engagement de puissance. Le fonctionnement de monte-escalier est assuré même en l'absence d'énergie électrique. Les mouvements de la plate-forme, accoudoir et bande sont automatiques, également l'absence de la grille favorise un bon résultat esthétique.

🇩🇪 Der **Stepper**-Treppenlift ist ein System zum Befördern von alten Menschen oder Menschen mit Behinderungen. Das Stromnetz (230V) und die Ausrüstung von Batterien 24V macht es ideal für den geringen Stromverbrauch. Besondere Aufmerksamkeit wurde dem Fahrkomfort zugewendet: leiser Betrieb, erleichterte Umgänglichkeit und ein besonders weicher Vorschub machen **Stepper** für jede Art Treppe geeignet.
